

Help Improve the Kidney Transplant Experience for the Black Community!

Study Details

We want to learn more about attitudes toward and experiences with the genetic testing that's often done before kidney donations and transplants. We hope to help increase understanding of health disparities and improve transplant policies for Black people.

You might be eligible to participate if you are Black and one of the following:

- A kidney donor or recipient
- A kidney donor candidate
- A family member of a deceased kidney donor
- A patient with chronic kidney disease
- On the kidney donation waiting list
- The blood relative of a patient on dialysis

Participating involves:

- Completing an approximately 30 minute survey on your computer, phone, or tablet
- A \$20 gift card for you after completing the survey
- An entry into a raffle to win one of three bonus payments of \$300, \$200, or \$100
